

Product Information

Passenger Car Industry

Porsche 911 Turbo/ Mercedes SL55 AMG

As the leading manufacturer of customer oriented system solutions, AKG has gained a worldwide reputation.

AKG is renowned as a reliable supplier of high quality, high performance heat exchangers and has been a dependable partner for the passenger car industry for more than 75 years.

We work closely with our customers. Thus we continuously develop customized solutions for heat exchangers or even complete radiator modules which are tailored to suite the market.

AKG offers the right solution for all cooling problems!

Product List:

- Intercooler
- Coolant Cooler
- Gearbox Oil Cooler
- Motor Oil Cooler

Product features

- High flexibility during development and production
- Realization of smaller and medium sized volumes
- High specific cooling performance of our optimised cooling systems
- A powerful partner for the supply of module components

- Tailor-made low temperature water coolers for indirect intercooling as an additional component for the serial cooling module
- High specific cooling performance with lowest build depth
- Excellent corrosion resistance
- Recycle-friendly design, all-aluminium-build
