

Product Information

High performance heat exchangers for construction equipment

AKG is projecting and manufacturing worldwide custom-tailored heat-exchanger-solutions for a various of applications and operational conditions from wheel-loaders to hydraulic-excavators up to tunnel propulsion-machines.

AKG designs module- and system-solutions consisting of single-circuit- or multiple-circuit coolers in a compact type of construction, out of high performance components with individual, application-specific optimized design.

AKG offers the right solution for all cooling problems!

Fields of application

- Excavators
- Cranes
- Concrete mixers
- Loaders
- Graders
- Street millers
- Asphaltting machines

- Rollers
- Caterpillars
- Soil compacters
- Railway construction machines
- Drilling equipment
- Tunnel driving machines
- other
